

Dillon

Semen syndication

Dillon measured 69.25" TTT on his second birthday (March 26, 2014). Now, at 25 months of age he is 71.5". His sire, Top Caliber, measures 86.5625" TTT, and his dam, RM Miss Kitty, measured 90" in March of this year when she was sold at the Legacy for \$61,000. Miss Kitty's dam, Phenomenon's Classy Lady, measured 78.25", so the family has a history of good horn growth genetics. With his parents having over 176" of tip to tip measurement between them, it is no surprise that Dillon projects to 92.60" at maturity. Not only is he the most exciting up and coming bull from the standpoint of horn genetics, he also has a strong libido and wants to work. He has just been collected at Elgin, and in just over one month, he generated 744 straws of semen which passed all of Elgin's quality protocols. As young as he is, he has three calves on the ground the first of which was conceived when he was just 13 ½ months old.

Syndicate information

- Fairlea Longhorn Ranch, LLC (owner of Dillon) is seeking progressive breeders who want to improve their breeding program and take it to the next level. To that end, this syndicate is being formed to enable partners to utilize Dillon's genetics to improve their program before his semen is available to the rest of the industry.
- Each syndicate share includes 15 straws per year for two years. The semen is priced at \$200 per straw, so each syndicate partner will be committing \$3,000 per year or \$6,000 for the two year life of the syndicate. Once committed each partner is locked in for the full 30 straw offering which can be bought either outright or split evenly in years one and two.
- Semen type will be strictly conventional for this syndication.
- Shares may be split among breeders so long as all partners are identified and with the understanding that all the semen in each share will be delivered to the same address. Fairlea will pay the cost of shipping to one address per share.
- Fairlea will publicize Dillon via print advertising, e-blast, and a website dedicated to Dillon which will list each partner and provide links to their websites to promote their programs.
- By committing to the syndicate, both Fairlea and syndicate partners agree that the semen on Dillon may not and will not be sold during the two year life of the syndicate to anyone who is not either an owner of Dillon or an identified partner of the syndicate. After the two year life of the syndicate has passed, there will be no restrictions on sale of Dillon semen.
- Fairlea and syndicate partners may flush their cows to Dillon and market the embryo mating or sell cows carrying his service. They may also do ET, or IVF using Dillon semen with cattle they do not own as long as they receive no less than half of the progeny produced from the super ovulation process. However, selling the semen to third parties is strictly prohibited.
